**The Remedies legislation requires procurement  
professionals in the public sector to follow a complex  
route map. Getting it wrong can be both expensive  
and damage reputations**

This workshop is designed to provide delegates with a clear  
understanding of the requirements of the legislation and its  
practical application.

After a brief summary of the changes to the Remedies rules,  
we then “flip” and look at these from the bidder’s perspective,  
and seek to understand how they build a case for challenge.  
We will look at the “nuts and bolts” of litigation, tactics, costs,  
disclosure and successful defence focusing on several recent  
cases in this field.
